

BBOX Home

Disassembling the Case

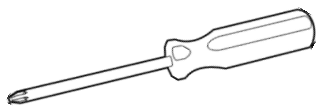

13 June 2016

Introduction

This guide will show you how to correctly access the internal components of a BBOXX Home by taking the case apart.

Requirements

For this guide you will need the following tools:

1x Phillips PH2
screwdriver

1x empty container

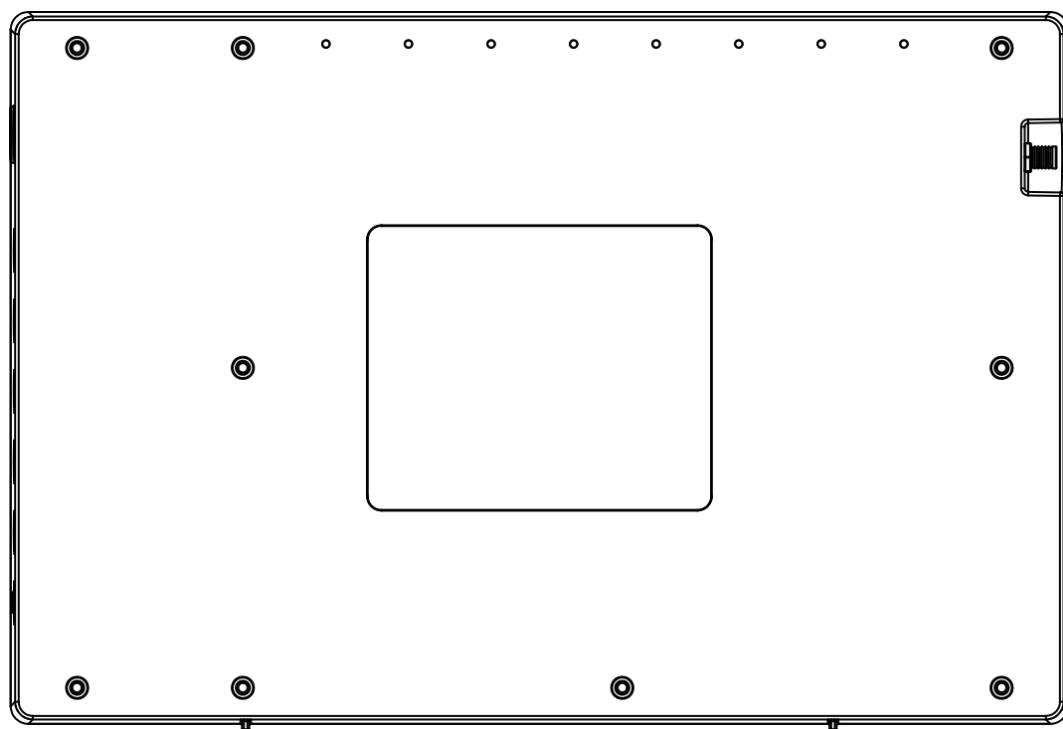

Prerequisites

This guide has no prerequisites.

Instructions

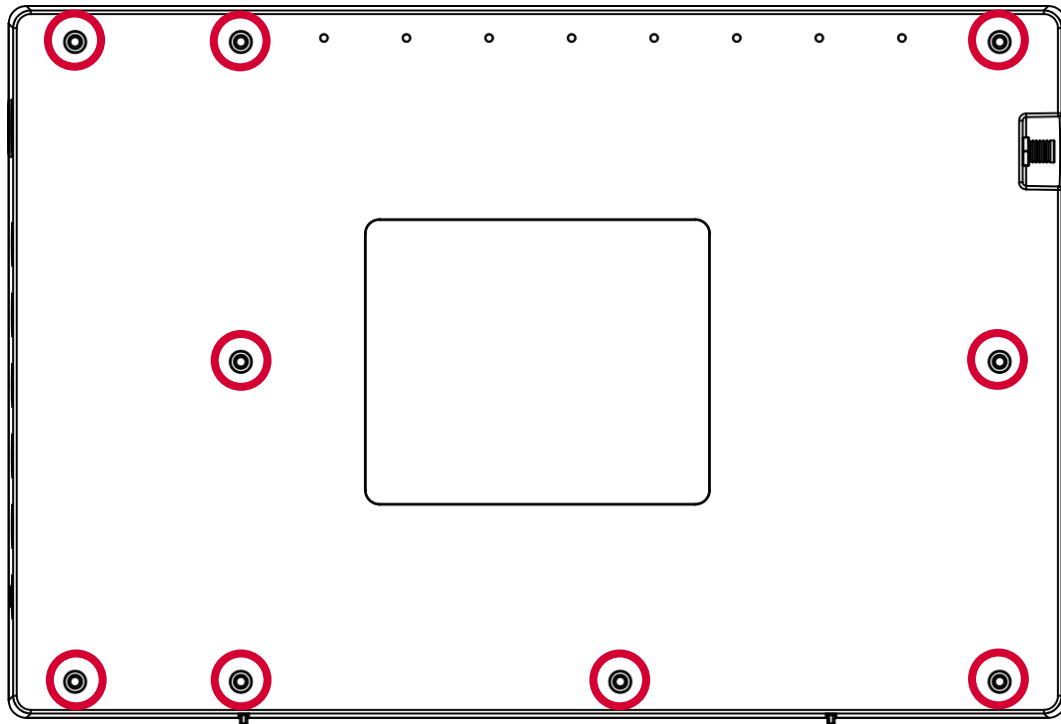

Follow the instructions below to learn how to disassemble the casing of a BBOXX Home.

Step 1 – Starting position

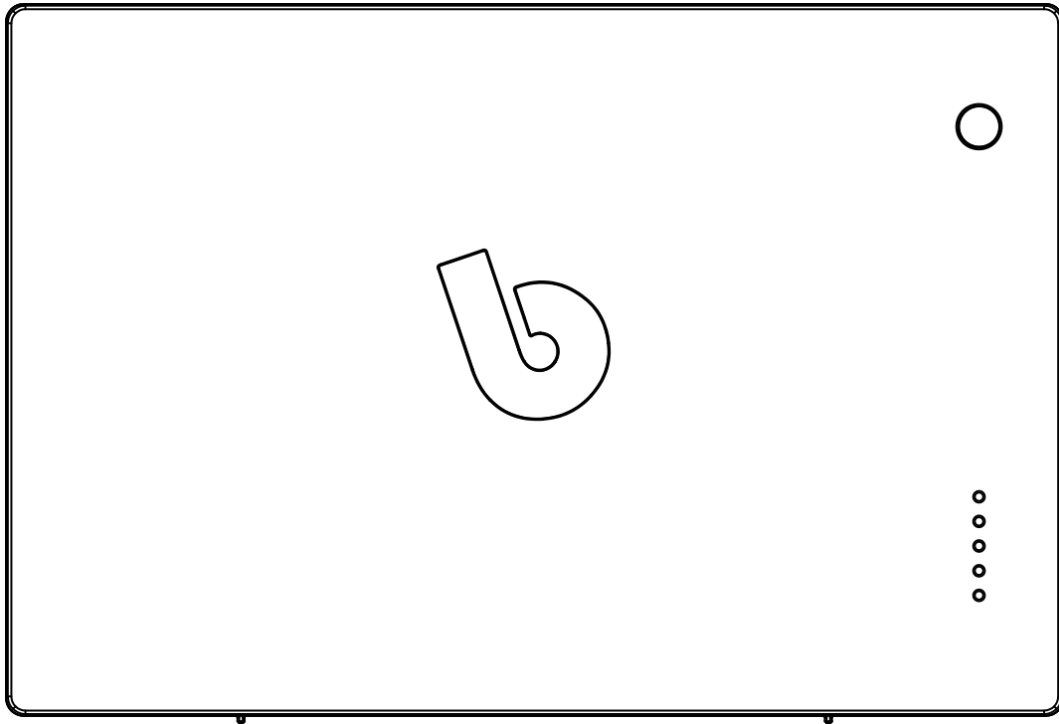

- Place the BBOXX Home on a flat surface with the logo facing down.

Step 2 – Remove the screws

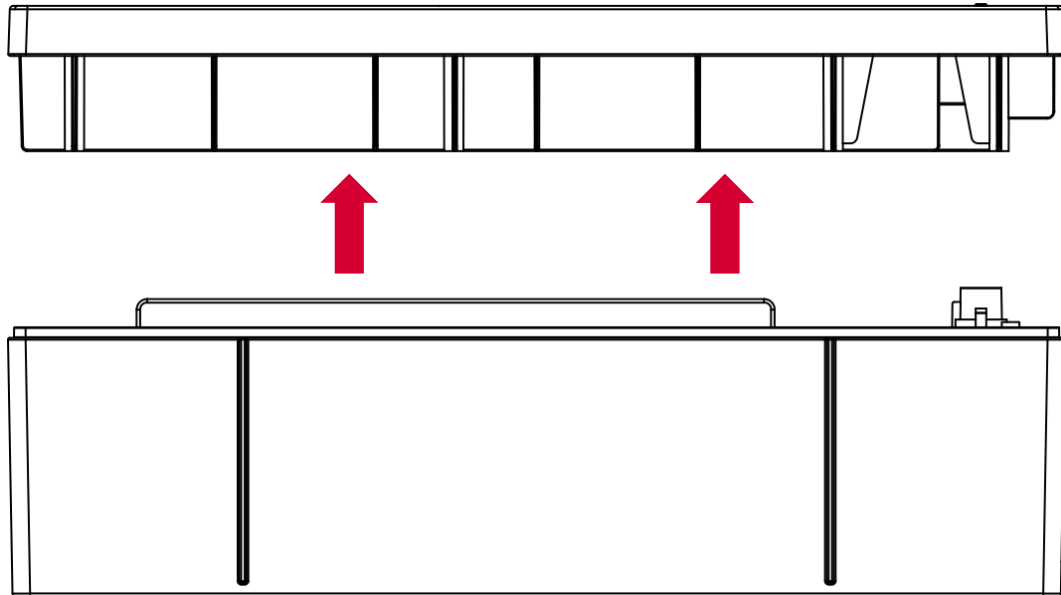

- Using the screwdriver unscrew and remove the 9 screws which hold the base and lid together.
- If you're unable to get the screws out of the holes, leave them in there. However, be sure they are all fully unscrewed before moving to the next step.
- Place any screws you can remove into the empty container to keep them safe.

Step 3 – Flip Over

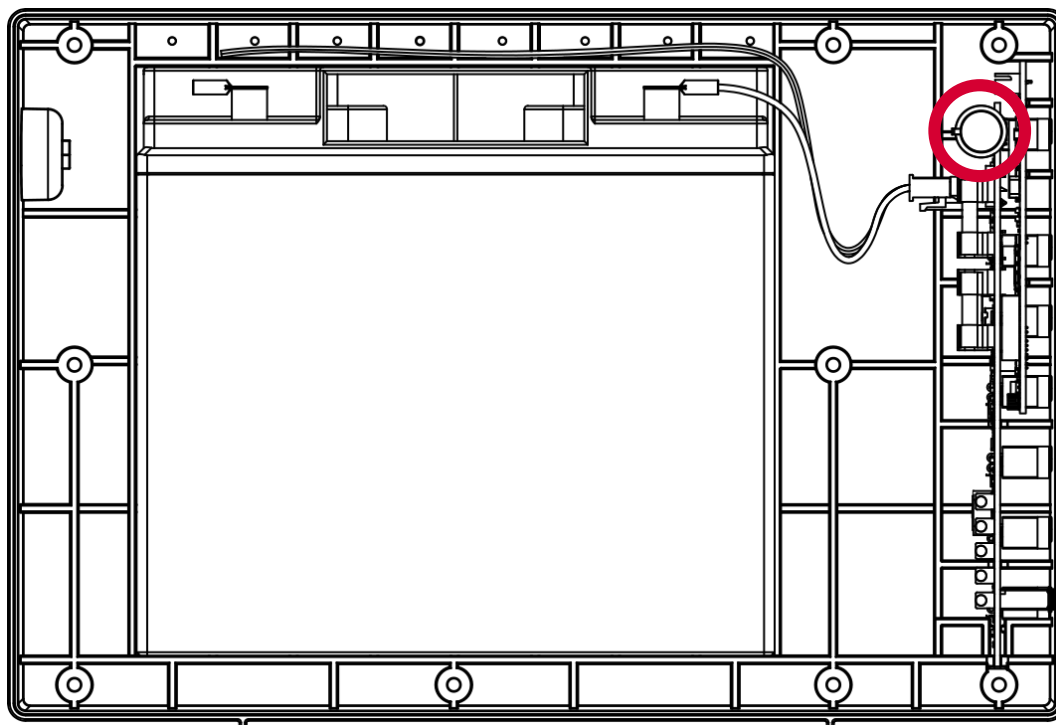

- Flip the BBOXX Home over on your work surface, keeping the lid and base together.
- Be aware of any screws that may fall if you couldn't remove them in the previous step.

Step 4 – Remove the lid

- Gently wiggle and lift the lid straight up.
- Once clear of the base and switch, place the lid to the side.

Step 5 – Remove the button

- Remove the button cap and place it in the container to keep safe.

You have now disassembled the BBOX Home case.

Additional Support

If any of the below are true please contact BBOXX Product Support directly for help.

- I did not find this document helpful
- One or more of the steps in this document are confusing to follow
- There are errors in this document
