

BBOX Home

Assembling the Case

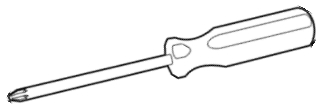

13 June 2016

Introduction

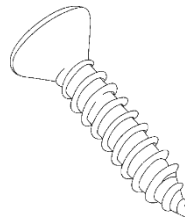

This guide will show you how to correctly access the internal components of a BBOXX Home by taking the case apart.

Requirements

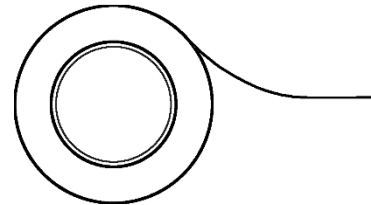

For this guide you will need the following tools:

1x Phillips PH2
screwdriver

9x 18mm M3 screws

1x 3cm strip of tape

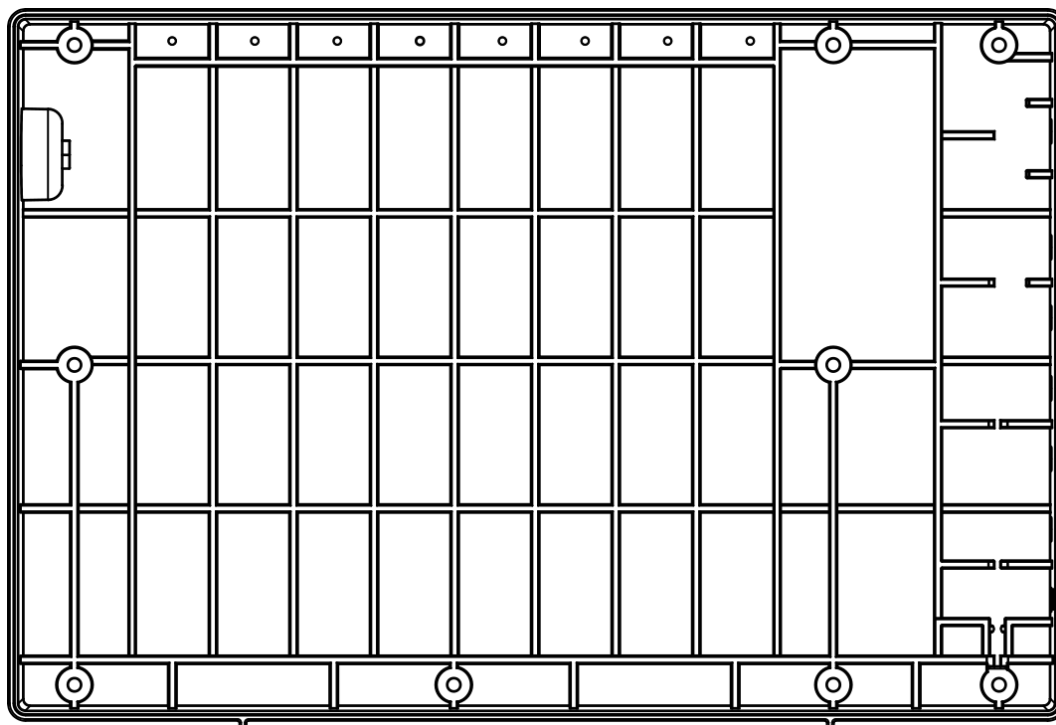

Prerequisites

This guide currently has no prerequisites.

Instructions

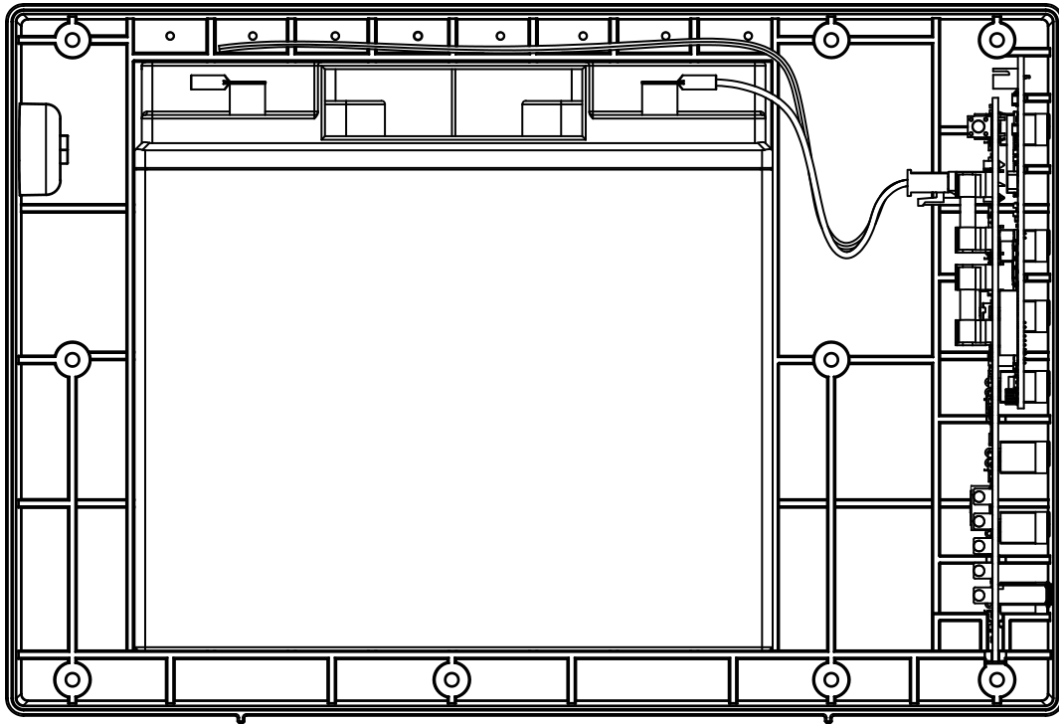

Follow the instructions below to learn how to assemble the casing of a BBOXX Home.

Step 1 – Starting position

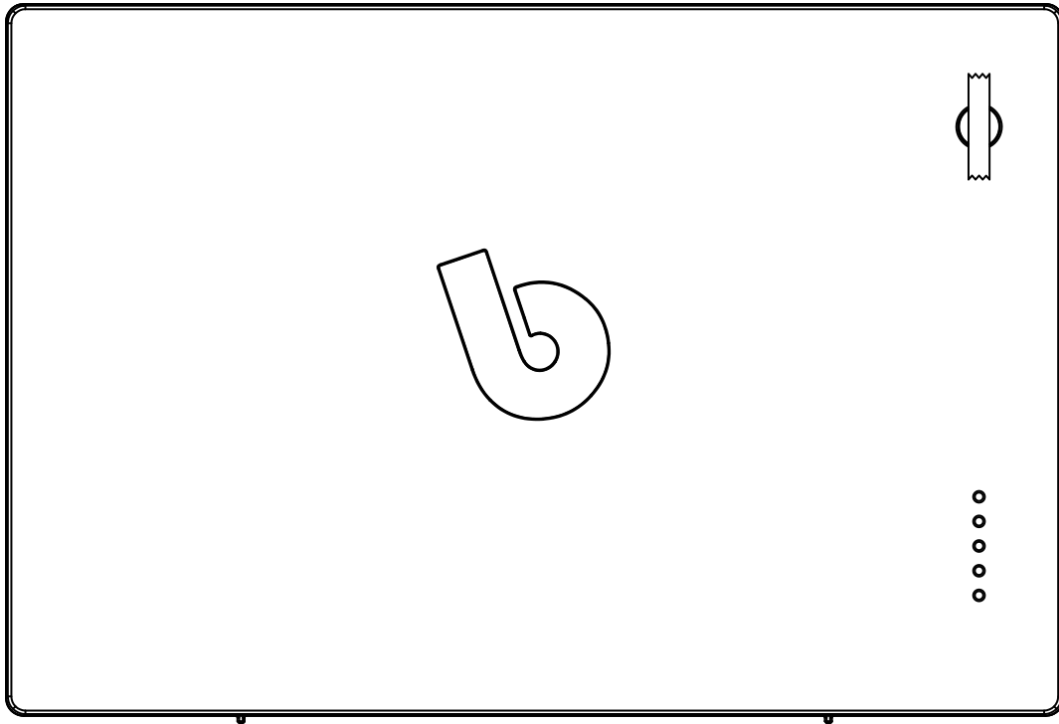

- Place the BBOXX Home on a flat surface with the open side facing up.

Step 2 – Place and check internal components

- Place all components into their respective locations.
- Before closing the case double check all connections are secure and the cables are tidy.
 - Antenna connectors are secure
 - Temperature sensor connector are secure
 - Power connector is secure
 - Antenna and battery cables are clear of screw holes
 - Antenna and battery cables are not crushed by the battery

Step 3 – Prepare the lid

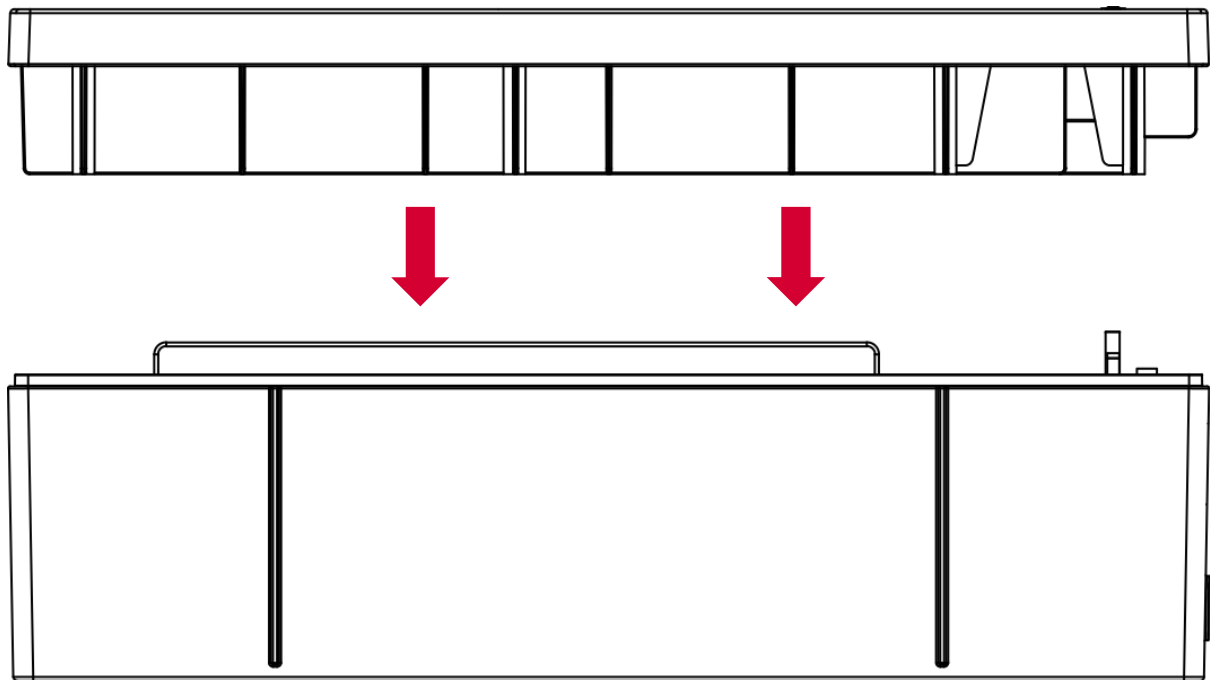

- Insert the button into the lid in the correct position.
- Secure the button in place using the tape to ensure that when the lid is placed onto the base the switch will line up perfectly.

WARNING

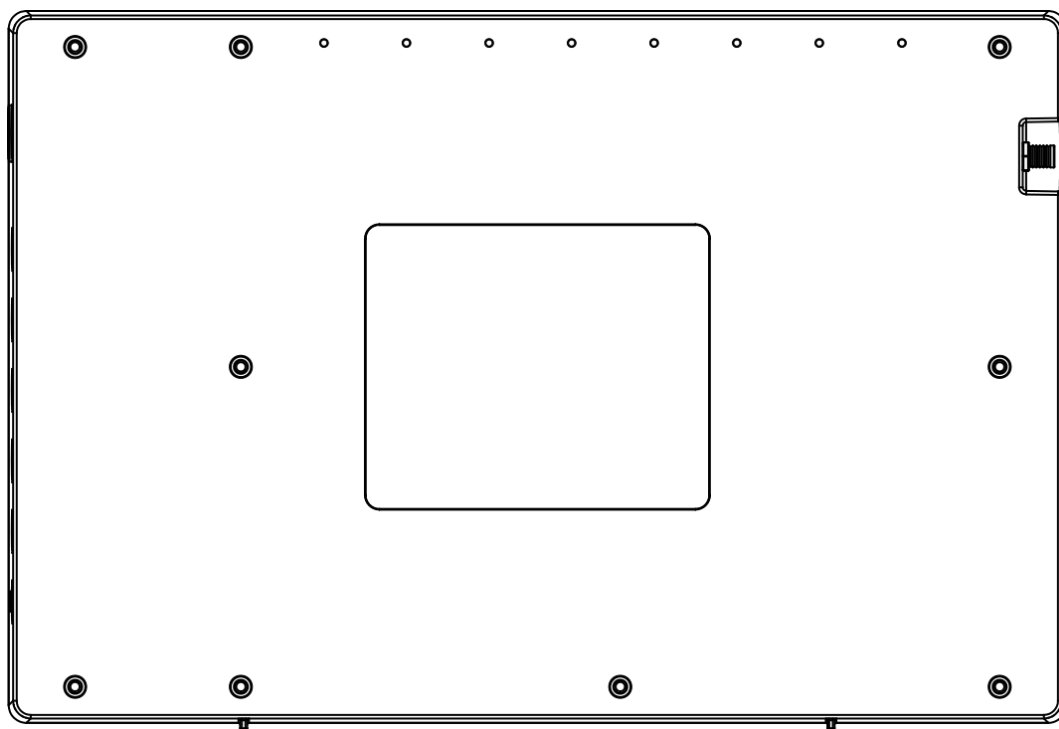

If you decide to proceed to the next step without securing the button into place with the tape you will risk damaging the switch.

Step 4 – Place the lid

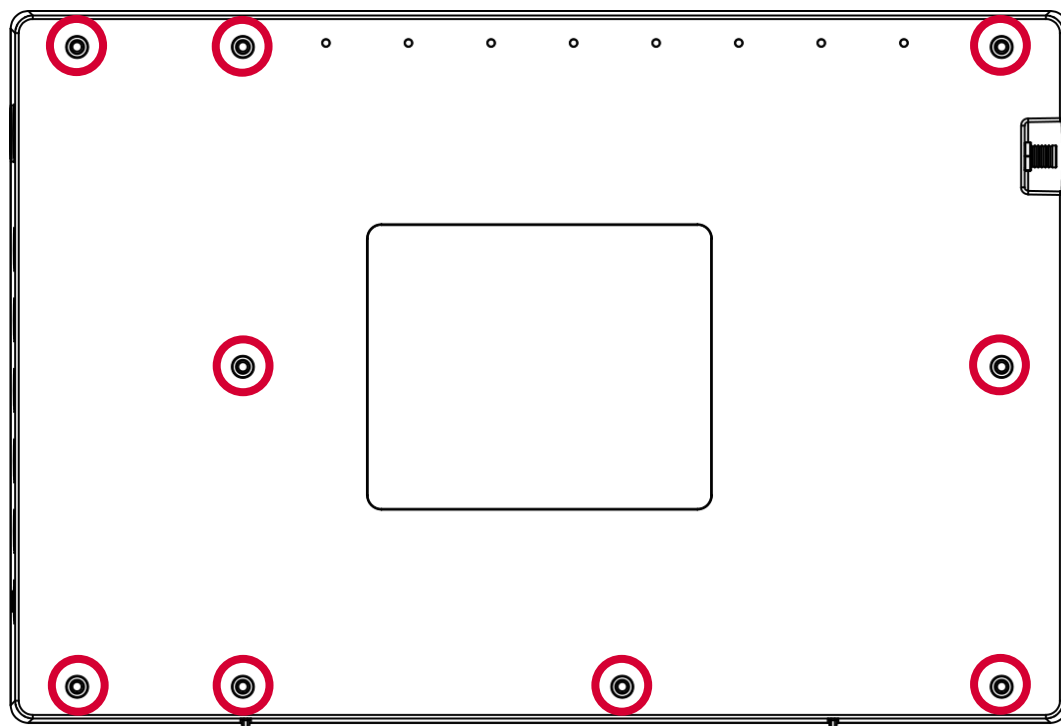

- Carefully place the lid onto the base.
- The lid should slide easily fit into place. If there seems to be any resistance then again to make sure there's nothing in the way.

Step 5 – Flip over

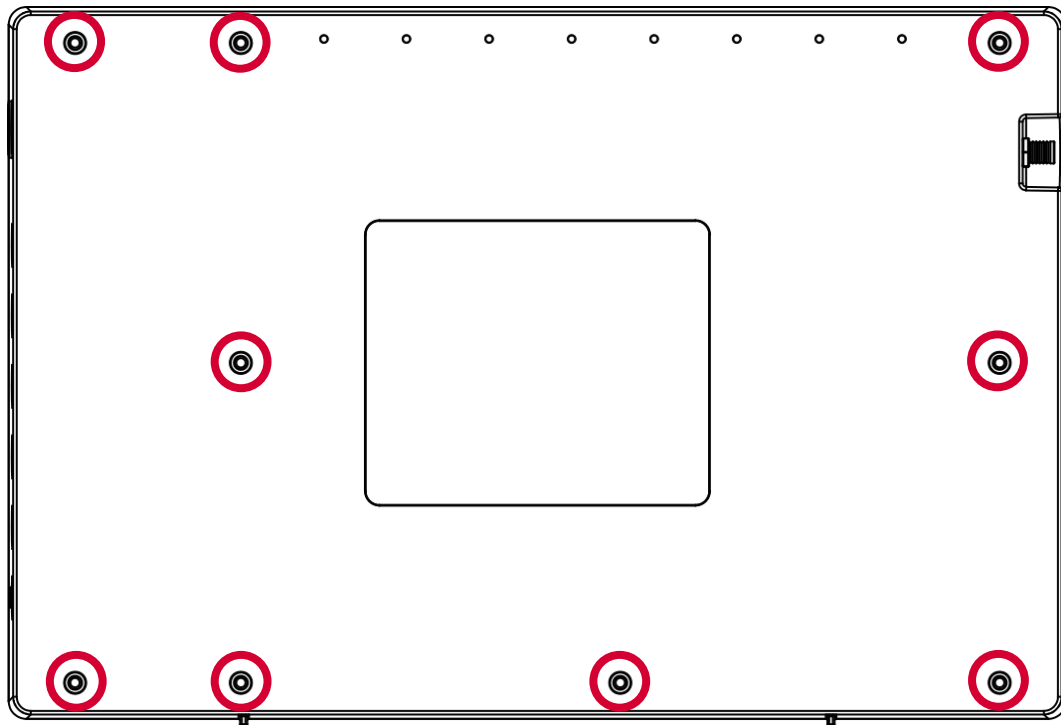

- Keeping the lid and base held firmly together with your hands, flip the BBOXX Home over on your work surface.

Step 6 – Place screws

- Insert and loosely screw in all 9 screws.

Step 7 – Tighten the screws

- Press firmly on the base to make sure the lid and base are held close together and go back and hand-tighten all of the screws.

You have now assembled the BBOX Home case.
